

ATF-MAX

FULLY PROGRAMMABLE EVERYDAY FEEDER

FEATURES

- Fully programmable for 1 to 4 feedings per day
- Amount of each feeding is programmable
- Instant manual feeding with a button press
- Works with flake, crisps, pellets and sticks
- Extendable hopper holds up to 450 ml of food
- Mounts with a clamp or rests in a cradle

Requires 3 AA Alkaline Batteries: Not included

Aquatop's ATF-MAX Fully Programmable Automatic Fish Feeder is the go-to automatic feeding system for hobbyists from beginner to advanced. The hopper keeps food dry and dosages are programmable, so the right amount of food is delivered at the time of your choosing; up to 4 times per day!

Three different augers are included, so the ATF-MAX will work flawlessly with flake, crisp, pellet, or stick style foods. Easy programming lets you decide when and how much to feed. Instantaneous manual feeds are possible with the press of a button for an occasional snack. A low battery indicator gives you plenty of time to prevent any loss of power. Function keys are protected and splash-proof.

Amount of each feeding is programmable

Mounts with a clamp or rests in a cradle

Extendable hopper holds up to 450 ml of food
