

OWNER'S MANUAL

INSTRUCTIONS

1. Install the pump upright on the wall of the aquarium and immerse it completely.
2. Intake water can draw from the bottom or from the side according to your selection.
3. Output can be run through the spray bar or through the flat diffuser.
4. When using the venturi, attach the air tube to the output making certain that the other end is placed outside of the water to draw in air.
5. Connect to a DC 5V USB power supply maintaining a proper drip loop to prevent stray droplets of water from traveling down the cord directly into the power supply.
