

GH HEATERS

Submersible Glass Aquarium Heaters

THE GH SERIES

Maintain constant and stable temperatures for your aquatic creatures to thrive with AquaTop's GH Series aquarium heaters. This analog glass heater offers simple and easy installation with the use of the included suction cups and can handle aquariums up to 75 gallons. With the highly visible temperature setting, the GH Series is easy to set and adjust to the desired temperature with the use of the Temperature Adjustment Knob. This powerful aquarium heater also has double insulation and is made from high quality insulated glass.
