PREMIUM QUARTZ GLASS HEATER

AquaTop's Platinum Quartz Glass Heaters are fully submersible and suitable for both freshwater and marine applications.

With an easy to adjust temperature setting knob, these heaters are capable of heating your water quickly and accurately from 68 to 93 degrees Fahrenheit. This fully submersible, strong quartz glass design allows for flexibility in placement. And the Quartz Platinum Heaters come with our Platinum Shield limited lifetime warranty.

THE PLATINUM DIFFERENCE

AquaTop Platinum is the result of years of product development, experience and refinement. Our Platinum Series Products are a step above. A premium product line meticulously manufactured and tested to our highest standards to ensure function and reliability for ultimate customer satisfaction and product longevity. AquaTop goes a step beyond, offering Platinum Shield, a limited lifetime warranty against defects and failure for the life of the product.
